

Attorney Docket: 01066
U.S. Application No. 09/923,320 Examiner NGUYEN Art Unit 2154
Response to July 31, 2007 Office Action

AMENDMENT TO THE CLAIMS

RECEIVED
CENTRAL FAX CENTER

OCT 26 2007

1. (Currently Amended) A method of notification ~~for notifying an offline user~~, the method comprising:

monitoring a total number of users who log in to a website;
comparing the total number of users to notification criteria of an ~~the~~ offline user, the notification criteria specifying a preset amount of users that log in to the website; and
when the total number of users exceeds the preset amount, then sending a caller identification message ~~notification~~ to the offline user [L]];
receiving a response to the caller identification message using off-hook signaling;
receiving a monitoring notification from an operator of the website, the monitoring notification informing of a particular user that has logged into the website, the monitoring notification identifying contact information for buddies in a buddy list who wish to be informed of the particular user's entry into the website, the monitoring notification comprising text to be delivered to the buddies in the buddy list;
converting the text in the monitoring notification to an audible message;
delivering the audible message to a telephone number of a buddy in the buddy list;
receiving the buddy's response to the audible message via an interface to an interactive voice response unit;
prefacing the response with an explanation of why the buddies will receive the buddy's response; and
broadcasting the buddy's response to the buddies in the buddy list,

wherein the notification informs the buddy ~~offline user~~ ~~of an amount~~ of activity in the website.

2. (Canceled)

Attorney Docket: 01066
U.S. Application No. 09/923,320 Examiner NGUYEN Art Unit 2154
Response to July 31, 2007 Office Action

3. (Previously Presented) The method of claim 1, wherein the website is a chat room and the notification criteria further comprise a topic of discussion.
4. (Previously Presented) The method of claim 1, wherein the website is a game site and the notification criteria further comprise when a high score has been exceeded.
5. (Previously Presented) The method of claim 1, wherein the website is an auction site and the notification criteria comprise entry of a bid that exceeds a high bid submitted by the offline user.
6. (Previously Presented) The method of claim 1, wherein the website is an auction site and the notification criteria comprise a number of bids submitted ~~within a predetermined time period~~.
7. (Currently Amended) The method of claim 1, further comprising reporting the caller identification message ~~indication~~ to another offline user.
8. (Previously Presented) The method of claim 1, further comprising sending an offline communication to the offline user in accordance with the offline user's contact information.
9. (Original) The method of claim 8, wherein the contact information comprises a communication device type and an address of the communication device.
10. (Original) The method of claim 8, wherein the contact information comprises a plurality of communication device types of the offline user, addresses for each of the plurality of communication device types, and an order in which to attempt the plurality of communication device types.

Attorney Docket: 01066
U.S. Application No. 09/923,320 Examiner NGUYEN Art Unit 2154
Response to July 31, 2007 Office Action

11. (Previously Presented) The method of claim 8, wherein sending the offline communication comprises sending the offline communication to one of a wireline telephone, a wireless telephone, a caller identification device, a wireless access protocol device, a one-way pager, and an interactive pager.
12. (Cancel)
13. (Cancel)
14. (Currently Amended) The method of claim ~~13~~ 1, wherein receiving the buddy's response indication comprises receiving audio inputs ~~of the offline user~~ and converting the audio inputs to text for transmission through the global computer network ~~to the online user~~.
15. (Currently Amended) The method of claim ~~13~~ 1, wherein receiving the buddy's response indication comprises receiving audio inputs ~~of the offline user~~, recording the audio inputs as a digital audio files, and transmitting the digital audio files through the global computer network to the ~~online user~~ buddies in the buddy list.
16. (Currently Amended) The method of claim ~~12~~ 8, wherein sending the offline communication comprises sending the offline communication to one of an interactive pager and a wireless access protocol device, and
wherein receiving the buddy's response indication comprises receiving an input of the offline user from the interactive pager or the wireless access protocol device, and
~~wherein reporting the indications comprises transmitting the indication to the online user through the global computer network.~~
17. (Original) The method of claim 16, wherein the input comprises one of a standard message and a customized message.

receiving the buddy's response to the audible message via an interface to an interactive voice response unit;

prefacing the response with an explanation of why the buddies will receive the buddy's response; and

broadcasting the buddy's response to the buddies in the buddy list

~~when the total number of logged in users exceeds a predefined amount, then sending a notification to the offline user informing the offline user of an amount of activity in the instant messaging service;~~

~~receiving an indication as to whether the offline user will join the instant messaging service; and~~

~~reporting the indication to users logged into the instant messaging service.~~

49. (Canceled)

50. (Canceled)

51. (Currently Amended) A method for notifying an offline user of activities occurring on an auction website, the method comprising:

retrieving notification criteria under which to notify the offline user, the notification criteria specifying a preset amount of users that log in to the auction website;

monitoring a total number of users who log in to the auction website;

comparing the total number of logged in users to the preset amount; and

when the total number of logged in users exceeds a predefined amount, then sending a caller identification message to the offline user;

receiving a response to the caller identification message using off-hook signaling;

receiving a monitoring notification from an operator of the auction website, the monitoring notification informing of a particular user that has logged into the auction website, the monitoring notification identifying contact information for buddies in a buddy list who wish to be informed of the particular user's entry into the auction website,

Attorney Docket: 01066
U.S. Application No. 09/923,320 Examiner NGUYEN Art Unit 2154
Response to July 31, 2007 Office Action

the monitoring notification comprising text to be delivered to the buddies in the buddy list;

converting the text in the monitoring notification to an audible message;

delivering the audible message to a telephone number of a buddy in the buddy list;

receiving the buddy's response to the audible message via an interface to an interactive voice response unit;

prefacing the response with an explanation of why the buddies will receive the buddy's response; and

broadcasting the buddy's response to the buddies in the buddy list

~~when the activities satisfy the notification criteria, sending a notification to the offline user informing the offline user of a level of activity in the auction website.~~

52. (Currently Amended) The method of claim 51, wherein the notification criteria ~~are one~~ comprises at least one of:

when a bid is entered that exceeds a high bid of the offline user, and
when the number of bids entered within a duration exceeds a preset amount.

53. (Cancel)

54. (Previously Presented) The method of claim 51, further comprising reporting a high bid from the offline user to users logged into the auction website.
